## Leaders in Venous Technology

#### Dear Esteemed Guests,

On behalf of the Egypt & Africa Venous Lymphatic Association "EAVLA", it's my pleasure to welcome you to our International Vein Conference.

EAVLA is a non-profit organization established in 2019 with the aim of promoting education in the fields of venous and lymphatic disorders. We have conducted multiple virtual activities and collaborations with various organizations, most recently with the American Venous Forum, which were well attended by audiences from all over the world.

I am honored to welcome you to the second EAVLA International Vein Conference, featuring the collaboration of three distinguished societies - the American Venous Forum, the European College of Phlebology, and the International Compression Club. Each society will hold a full session, for which we are very grateful.

We are delighted to have the participation of the presidents and past presidents of six societies, including Prof Alun Davies & Prof Cees Wittens of the ECoP, Dr Ruth Bush President of the AVF, Dr Laura Redman President of the SA Venous Society, Dr Nadjib Bouayed Past President of the Vascular Society of Algeria, and Dr Imed Freikha President of the Tunis Vascular Society, and Prof Jean-François Uhl of the ICC.

I would like to express my gratitude to all the speakers who have traveled from different parts of the world and from distant locations in Egypt to share their knowledge and experience with us.

This meeting will consist of five sessions, with ample time dedicated to discussions. You are all invited to interact with the speakers through the moderator. You are also invited to visit and interact with the exhibitors between the sessions, for whom we are very thankful. It is only with their generous sponsorship that this conference was made possible.

A special welcome to our guests and delegates from all over the world. I hope you all have a great educational experience and an enjoyable time.

Rashad Bishara

President FAVI A

Ahmed Gaweesh

Vice-president EAVLA

& Jimm-

1

- Granudacyn® cleanses, moistens and facilitates debridement.
- Granulox® oxygenates chronic wounds, promotes healing.
- Exufiber® dressings efficiently transfer exudate to the secondary dressing and is easy
  to remove in one piece and Exufiber® Ag+ can prevent re-formation of biofilm (in vivo)
  as part of a biofilm management approach.
- Mepilex® Border Flex stays on and uniquely conforms. It provides a good balance
  of exudate absorption and moisture vapour loss, maximising exudate management.
  Giving you confidence to leave the dressing on for longer and still maintain a good
  wound healing environment.

# RESTORING MOVEMENT RESTORING QUALITY OF LIFE\*

Working together to get patients on their feet again.

### **OUR GENEROUS SPONSORS:**

#### **SPEAKERS INSTRUCTIONS:**

#### Congress halls will be equipped with:

Two laptops: one Apple Mac & one PC with Microsoft Windows 11 and Microsoft Office 2019. Internet access will NOT be available inside the meeting rooms.

#### To ensure that the meeting progresses smoothly, please stick to the following instructions:

- All presentations should be recorded on a USB flash memory (preferred).
- Please save presentations in PowerPoint 2007 or later format for PC & Keynote for Apple.
- Upload your presentation early to the Audiovisual Center (RM Events) as we will load
  the presentations to the hard drive of our systems one hour before the sessions.
- No personal laptops are permitted for presentations.
- In case you have problems with your presentation(s), please do not hesitate to contact the IT support team (RM Events).

# COMPUTERIZED COUNT-DOWN Timer

#### will monitor speakers' time

So make sure to present during the given time, as NO EXTRA TIME IS ALLOWED

### The Thrombectomy System with Continuous, Active Aspiration

The Aspirex™ S Mechanical Aspiration Thrombectomy System offers efficient aspiration in acute occlusions with multiple indications including:

- · Veins
- Arteries
- · Dialysis access
