Welcome

Dear Esteemed Guests,

It is with great pleasure that the Egypt & Africa Venous Lymphatic Association (EAVLA) welcomes you to our International Vein Conference.

As a not-for-profit organization founded in 2019, EAVLA is dedicated to promoting education in the fields of venous and lymphatic diseases. We are proud to have conducted multiple virtual activities during the COVID pandemic and are thrilled to now initiate our in-person international conference.

We extend our gratitude to the expert speakers from around the world who have joined us to share their knowledge and expertise with our vascular community. We would also like to extend a special welcome to our guests from all over the world; we have 15 nationalities representing nearly all continents globally.

This meeting consists of five sessions, and we invite you to visit and interact with our exhibitors between the sessions. We are very thankful for their generous sponsorship, as their support has made this conference possible.

Our workshops consist of mini symposia, where each session starts with a small presentation by an expert in the field, followed by interactive discussions and practical demonstrations. Workshops will be held in Halls 1 & 2 and are designed so that every attendee can attend every workshop.

We hope you all have a great educational experience and an enjoyable time at our International Vein Conference.

SPEAKERS

Instructions

Congress halls will be equipped with:

Two laptops: one Apple Mac & one PC with Microsoft Windows 11 and Microsoft Office 2019.
Internet access will NOT be available inside the meeting rooms.

To ensure that the meeting progresses smoothly, please stick to the following instructions:

- All presentations should be recorded on a USB flash memory (preferred).
- Please save presentations in PowerPoint 2007 or later format for PC & Keynote for Apple.
- Upload your presentation early to the Audiovisual Center (RM Events) as we will load the presentations to the hard drive of our systems one hour before the sessions.
- No personal laptops are permitted for presentations.
- In case you have problems with your presentation(s), please do not hesitate to contact the IT support team (RM Events).

COMPUTERIZED *Timer* COUNT-DOWN

will monitor speakers' time

So make sure to present during the given time,

Thursday
15 June 2023

9:00 - 10:00 **Registration**

HALL 1

10:15 - 10:30 **Opening**

10:15 - 10:30 Opening words from EAVLA
Rashad Bishara

Alun Davies, Kurşat Bozkurt, Sergio Giancesini
in alphabetical order

HALL 1

10:30 - 12:00 Session 1: Aesthetic & Superficial Venous System

Moderator: Alun Davies

Chairpersons: Ahmed Farouk Mira, Emad Hussein, Essam Elkady, Ihab Nabil Hanna,
Mahsoub Mourad

10:30 - 10:45 Keynote: Comparison of long-term results of modern ablation methods
Ravul Jindal

10:45 - 10:57 Venous anatomy with use of immersive reality with Oculus
Jean François Uhl

10:57 - 11:09 Reflection on my experience with ClaCS technique
Kurşat Bozkurt

11:09 - 11:21 Does GSV ablation affect the quality of life
Elena Goranova

11:21 - 11:33 Difference between types of Glue for veins
Kurşat Bozkurt

11:33 - 11:39 Bullet presentation: Pulsatile varicose veins
M. Nadjib Bouayed

11:39 - 11:45 Bullet presentation: Post-procedure thromboprophylaxis
Lorena Grillo

11:45 - 11:50 Debate: Does laser crossectomy prevent recurrence?: With the motion
Ahmed Gaweesh

11:50 - 11:55 Debate: Does laser crossectomy prevent recurrence?: Against the motion
Sergio Giancesini

11:55 - 12:00 **Discussion**

Thursday
15 June 2023

12:00 - 12:30 **Coffee Break**

HALL 1

12:30 - 14:00 **Session 2: Phlebology**

Moderator: Sergio Giancesini

Chairpersons: Alaa Abdel Halim, Ayman Abdelfattah, Ayman El Samadoni,
Mounir Mabrouk, Nasser El Said

12:30 - 12:45 Keynote: State of the art on the diagnosis and treatment of lymphedema
Franz-Josef Schingale

12:45 - 12:57 The evolution of compression devices and their appropriate role in
clinical practice
Jean François Uhl

12:57 - 13:09 My approach to treating venous malformations
Ravul Jindal

13:09 - 13:21 Do venotonic drugs improve the quality of life? Vein-Step Study
Yasmina Chhih

13:21 - 13:33 Complications in aesthetic phlebology & how to avoid them
Lorena Grillo

13:33 - 13:45 Cancer associated thrombosis: an update on the current evidence **sanofi**
Ahmed Gaweesh

13:45 - 13:50 Debate: Is there a role for surgery in lymphedema of the lower extremities?
With the motion
Yasser Mesbah

13:50 - 13:55 Debate: Is there a role for surgery in lymphedema of the lower extremities?
Against the motion
Franz-Josef Schingale

13:55 - 14:00 **Discussion**

HALL 1

14:00 - 15:00 **Breaking the Clot: DVT Interventions from Acute to Chronic**

Chairpersons: Ahmed Gaweesh, Sherif Omar

Speaker: Mohamed Okelah

HALL 1

15:00 - 15:30 **Advances in Wound Care**

Chairpersons: Ihab Nabil, Mosaad Soliman

Speaker: Ahmed Afandi

HALL 2

15:00 - 15:30 **Compression for Venous Leg Ulcers**

Chairpersons: Abdelaziz Ahmed, Ahmed Naga

Speakers: Jean Patrick Benigni, Pascal Filori

Thursday
15 June 2023

HALL 1

15:30 - 16:00 **Compression for Venous Leg Ulcers**

Chairpersons: Ihab Nabil, Mosaad Soliman

Speakers: Jean Patrick Benigni, Pascal Filori

HALL 2

15:30 - 16:00 **Advances in Wound Care**

Chairpersons: Abdel Aziz Ahmed, Ahmed Naga

Speaker: Ahmed Afandi

HALL 3

14:00 - 16:00 **Session 3: Rotary Session**

The importance of Rotary to take action on ulcer care

Sergio Giancesini

RC Cairo Nile Valley strategic project : Save leg ; Save family

Wassila Taha

Thrombosis and venous leg ulcers: the tight link

Maha Farouk

16:00 - 16:30 **Coffee Break**

HALL 1

16:30 - 18:00 Session 3: Pelvic Venous Disorders

Moderator: Kursat Bozkurt

Chairpersons: Amr Gad, Ayman Refaat, Hassan Lotfy, Hassan Soliman, Omar Elkashef

16:30 - 16:45 Keynote: Pelvic venous disorders: an overview
Suat Doganci

16:45 - 16:57 New classification of pelvic venous disorders
Zaza Lazarashvilli

16:57 - 17:09 Varicose veins and pelvic reflux: The dilemma
Sergio Giancesini

17:09 - 17:21 How to select the optimal stent for the lesion?
Michael Lichtenburg

17:21 - 17:33 Best ultrasound protocol for diagnosis of pelvic venous disorders
Wassila Taha

17:33 - 17:45 Interventional approach to PE: When & how?
Michael Lichtenburg

17:45 - 17:50 Debate: Embolization first or stenting first in case of concomitant pelvic reflux and proximal compression: With the motion
Zaza Lazarashvilli

17:50 - 17:55 Debate: Embolization first or stenting first in case of concomitant pelvic reflux and proximal compression: Against the motion
Ahmed Sayed

17:55 - 18:00 **Discussion**

HALL 3

09:00 - 10:00 Abstract / Challenging Cases Competition

Chairperson: Sergio Giancesini

Abstract competition committee: Ahmed Farghaly, Ahmed Sayed, Engie Hefnawy, Hadia Rafea, Hesham Mostafa, Hesham Sharafeldin, Maisa Abdel Wehab, Sherif Balbaa, Tamer Fekry, Tarek Abdel-Azim, Wael Shaalan

09:00 - 09:08 Dopplerographic sings of microcirculation disorders on patients with long COVID 19

Yulia Andozhskaya

09:08 - 09:16 A giant venous leg ulcer

Leila Ahlam Bouziane

09:16 - 09:24 Extended Compression Decreases Hyperpigmentation Rate after Sclerotherapy in Patients with Spider Veins and Telangiectasias

Askhat Sanbaev

09:24 - 09:32 Case Report Peripheral Vascular Complications in COVID-19 Bilateral and Multiple Extensive Thrombophlebitis of the Lower Limbs

Ayman Khalil

09:32 - 09:40 Venoactive Drug Treatment or Compression Stockings in Warm Weather Season in Symptomatic Patients with Chronic Venous Disease

Golovanova Olga

09:40 - 09:48 Effect of three times a week modified complete decongestive therapy on lower limb lymphedema with lymphorhea and post cellulitis

Eva Magdy Bottros Nakhla

09:48 - 09:56 Silicone Tube Implants replacing obliterated Lymphatics in Lymphedema of the lower and upper limbs in India

Rajesh N Hydrabadi

Each talk is 5 minutes followed by 3 minutes discussion

HALL 1

10:00 - 11:00 **Iliac Vein Stenting: Step-by-Step**

Chairpersons: Mohamed Ramadan, Walied Khreba

10:00 - 10:50 Iliac vein stenting in the acute setting

Rashad Bishara

10:50 - 11:00 v-WIN, UIP & the global VITAL call to inter-ACTION

for proper vein-lymphatic advancement

Sergio Giancesini

Medtronic
Engineering the extraordinary

11:00 - 11:30 **Coffee Break**

HALL 1

11:30 - 12:00 **Adjustable Wraps For Lymphedema**

Chairpersons: Mohamed Elmaadawy, Sameh Nasr

Speakers: Franz-Josef Schingale, Marcos Barbosa

HALL 2

11:30 - 12:00 **Improve Venous Health & Quality of Life**

Chairpersons: Amr Abd El Mawgoud, Mohamed Yehia

Speaker: Wassila Taha

Friday

16 June 2023

HALL 1

12:00 - 12:30 **Improve Venous Health & Quality of Life**

Chairpersons: Mohamed Elmaadawy, Sameh Nasr

Speaker: Wassila Taha

HALL 2

12:00 - 12:30 **Adjustable Wraps For Lymphedema**

Chairpersons: Amr Abd El Mawgoud, Mohamed Yehia

Speakers: Franz-Josef Schingale, Marcos Barbosa

12:30 - 13:30 **Lunch / Friday Prayer**

HALL 1

13:30 - 15:00 Session 4: Dive into The Deep System

Moderator: Cees Wittens

Chairpersons: Ahmed Osmane, Ahmed Taha, Atef Allam, Ihab Ateya Saad, Said Elmallah

13:30 - 13:45 Keynote: A critical look at the recent RCTs for DVT interventions

Cees Wittens

13:45 - 13:57 Is a mechanical device necessary for thrombolysis or is it the other way around?

Mohamed Okelah

13:57 - 14:09 Diagnosis and treatment challenges of May Turner Syndrome

Suat Doganci

14:09 - 14:21 Approach for tumors with ilio-caval involvement

Osman Mahmoud

14:21 - 14:33 Caval Confluence Technique in deep venous stenting: Is there a better one?

Suat Doganci

14:33 - 14:39 Bullet Presentation: Nut-Cracker syndrome: Is there an optimal treatment?

Mosaad Soliman

14:39 - 14:45 Bullet presentation: Varicocele embolization: When & how

Wessam Sherin

14:45 - 14:50 Debate: DOAC reduces the risk of Post thrombotic syndrome: With the motion

Sherif Essam

14:50 - 14:55 Debate: DOAC reduces the risk of Post thrombotic syndrome: Against the motion

Nehad Ahmed Fouad

14:55 - 15:00 **Discussion**

15:00 - 15:30 Coffee Break

Friday

16 June 2023

HALL 1

15:30 - 17:00 **Session 5: Venous Leg Ulcers (VLU)**

Moderator: Ravul Jindal

Chairpersons: Alaa Sharaby, Ayman Salem, Mamdouh Kotb, Wael Shaalan, Walid Al-Baz

15:30 - 15:45 Keynote: Venous leg ulcers: An overview

Alun Davies

15:45 - 15:57 Compression in VLU

Jean François Uhl

15:57 - 16:09 The role of MRV prior to iliac vein recanalization

Cees Wittens

16:09 - 16:21 Perforator surgery may be there is a need after all?

Alun Davies

16:21 - 16:33 Role of Modern Topical Oxygen Therapy: Case series in leg ulcer

Ahmed Afandi

16:33 - 16:39 Bullet presentation: Advanced wound care alternatives for VLU

Ihab Nabil

16:39 - 16:45 Bullet presentation: VLU in a patient with phlebo-lymphedema

Ahmed Khairy

16:45- 16:50 Debate: Ablation of refluxing GSV is necessary to heal VLU in the presence of PTS: With the motion

Tarek Abdel-Azim

16:50 - 16:55 Debate: Ablation of refluxing GSV is necessary to heal VLU in the presence of PTS: Against the motion

Rashad Bishara

16:55 - 17:00 **Discussion**

VenaCure 1470^{Pro}

Treat varicose veins with the precision of VenaCure EVLT.

Benefits

- Streamlined form factor fits the modern practice environment—and it's compact enough to transport between hospital and office.
- Intuitive touchscreen controls and custom treatment parameters.
- Preset capability enables quick and easy laser adjustments to suit individual preferences in multiple-practitioner practices and treatment types.

It is designed to work exclusively with the range of AngioDynamics fibers, including the NeverTouch[®] fibers. Maximizing these two technologies can result in even better patient outcomes¹. The 1470 nm laser allows effective vein ablation with the targeted energy of 30-50 joules/cm at a setting of 5-7 watts.

DuraMax[®]

- Angled venous tip and unique, proprietary guidewire lumen positions guidewire in the center of the leading edge of distal tip and provides superior over the wire performance and improved ease of insertion.
- Curved tip catheter technology reduces vein wall apposition and risk of arterial insufficiency. 3 cm tip stagger reduces recirculation rates.
- 15.5 F DuraMax catheter facilitates high flow rates at modest arterial pressures. Proprietary lumen design provides improved kink resistance and flexibility in challenging tunnel locations.
- Durathane[®] catheter material affords strength, softness, and resistance to a wide range of commonly used site care agents.
- Rotating suture wings ensure patient comfort and flexibility to position catheter.
- Robust polyester cuff material allows optimal tissue ingrowth and catheter securement.
- Thermoplastic Polyurethane Luers combine toughness, dimensional stability, and chemical resistance.

The DuraMax VascPak Catheter Kit configuration for vascular access centers is also available.

Uni-Fuse

INFUSION CATHETER

Innovative Slits for Consistent, Even Distribution of Lytic Agent.

Catheter Directed Thrombolysis

advantages over alternative treatments and is a viable option for managing thrombus. For over 20 years AngioDynamics has been the market leader for CDT catheters with its innovative slit technology to infuse a consistent, even distribution of lytic agent to an area of clot. The Uni[®]Fuse catheter uses this time-tested technology to provide faster and more effective treatment for clots, and its sturdier construction makes it more versatile.

FEATURES:

- Pressure Response Outlets: allow for even distribution of lytic throughout the length of the catheter
- Occluding Ball Wire: prevents kinking and provides the proper force to activate pressure response outlets
- Radiopaque Markers: for ease of placement
- Sturdier Construction: less catheter material is removed when making slits versus making holes allowing for a stronger catheter with more pushability
- Supports catheter over bifurcation
- Compatible with a 0.035" guidewire
- Longer infusion length options to treat longer clots

A standard sidehole catheter design results in the lytic agent following the path of least resistance causing uneven distribution.

The Uni[®]Fuse catheter with Pressure Response Outlets and the occluding ball wire allow for even pressure distribution throughout the catheter resulting in a more even distribution of lytic agents.

The Thrombectomy System with Continuous, Active Aspiration

The Aspirex™ S Mechanical Aspiration Thrombectomy System offers efficient aspiration in acute occlusions with multiple indications including:

- Veins
- Arteries
- Dialysis access

Notes

daflon® 1000 mg

Micronized purified flavonoid fraction 1000mg
Film coated tablets

*Efficacy
Adherence*

Rapid* . Powerful . Simple

* Rapid effect within 8 weeks and powerful when compared to Diosmin

For HealthCare professionals only

What DAFLON 1000mg, film-coated tablets, is and WHAT IT IS USED FOR:

Pharmacotherapeutic class: **VASCULOPROTECTORS/ MEDICINES ACTING ON CAPILLARIES/ BIOFLAVONOIDS.**

This medicine is a venotonic (it increases venous tone) and a vasculoprotector (it increases resistance in small blood vessels). It is recommended for treating venous circulation disorders (swollen legs, pain, restless legs) and symptoms due to acute hemorrhoidal attack. If the hemorrhoidal episodes persist for more than 15 days, it is essential that you consult your doctor.

It is indicated in the treatment of functional menorrhagia and premenstrual syndrome.

Do not take DAFLON 1000mg, film-coated tablet:

If you are allergic (hypersensitive) to micronized purified flavonoid fraction, especially diosmin(or hesperidin), or any of the other ingredients in this medicine.

Healthcare professionals are asked to report any suspected adverse reactions to Egyptian pharmacovigilance center (EPVC).

Ministry of Health leaflet approval date 28/2/2019.
